<sup>1</sup> The Community Foundation began tracking its investment performance in Q4 2008, when we hired an investment consultant, Mason Investment Advisory Services, Inc. (Mason) to help manage our portfolio and provide investment performance reporting. Performance is displayed net of all investment management fees, reflects the reinvestment of dividends and is calculated using the time-weighted return method. As of 6/30/15, the advisory fee paid to Mason was 0.42% and the total expenses paid to the mutual funds and ETFs was 0.35%. Since our inception with Mason, the Foundation has followed an asset allocation strategy that uses the targets provided in the charts above.

<sup>2</sup> 65/35 Domestic Stock Bond Mix derived from 65% of the Wilshire 5000 Total Market Index and 35% of the Barclays Capital Aggregate Index.

<sup>3</sup> 65/35 Global Stock Bond Mix derived from 65% of the S&P Global BMI Index and 35% of the Barclays Global Aggregate Index.

\* Performance of both of the stock/bond mixes is presented net of the average annual ETF and index fund expense ratio prorated monthly. This was the average expense ratio of all 1,523 ETFs and Index Funds included in the Morningstar database as of 9/30/13, which was 0.68%.

<sup>4</sup> COF survey results are provided as of the previous quarter-end date. Returns reported to COF are gross of only the advisory fee.

\* Past performance is not an indication of future results.
